### Bioarray develope a new Kit PGD-Seq

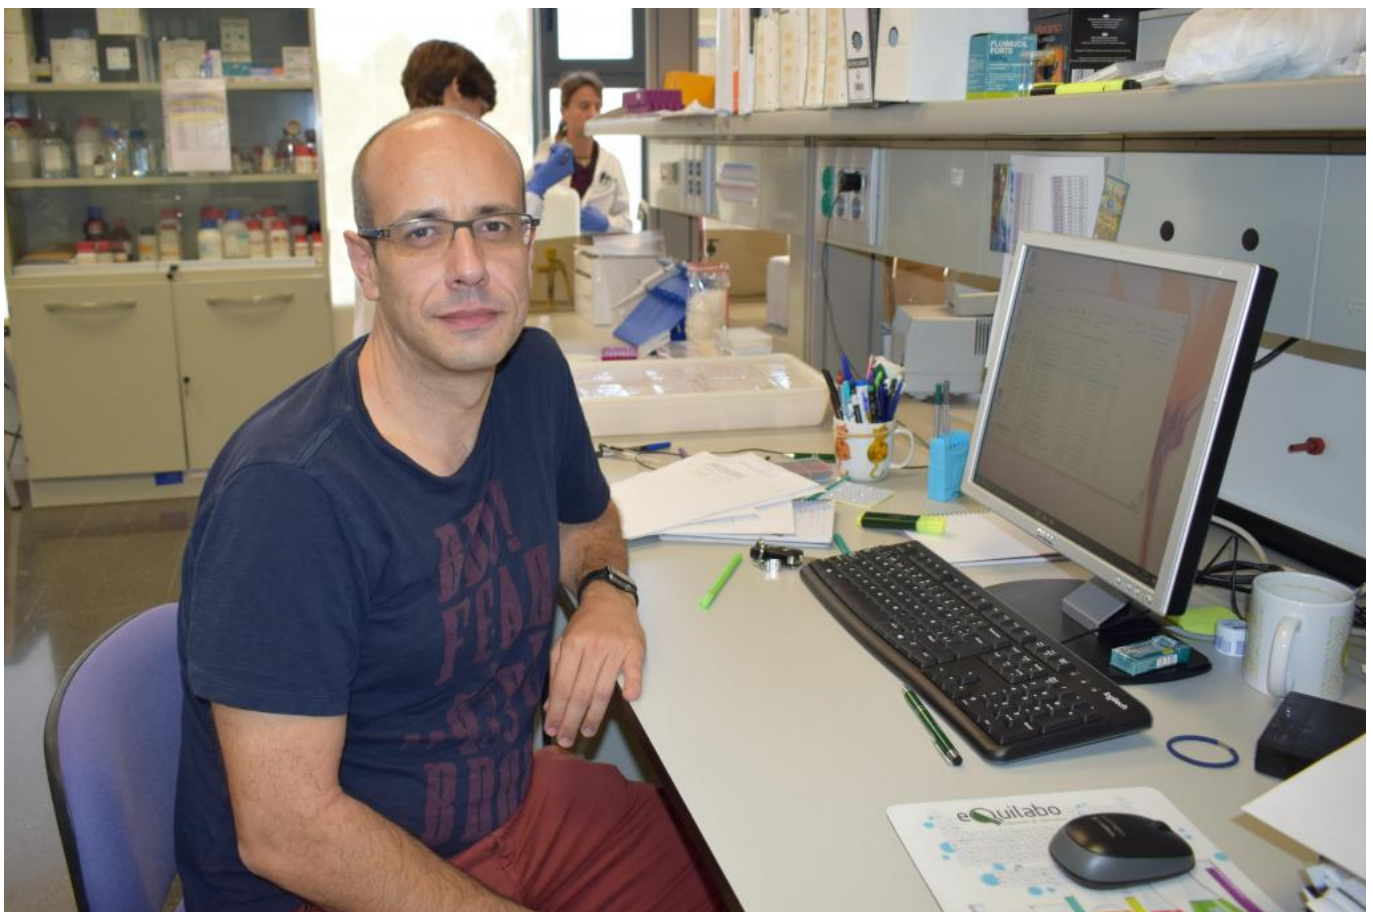

Submitted by Andrés Antón on Wednesday, 22 November 2017 - 2:38pm.

### Bioarray develope a new Kit PGD-Seq

The morning diaries of information [La Vanguardía](#) [1] and [ABC.es](#) [2] have published an article about the [PGD-Seq](#) [3] Kit developed by Bioarray that allows the detection, in a single biopsy, monogenic pathologies and the chromosomal errors necessary in the analysis of embryos in IVF.

Today it is an important advance in the assisted reproduction Luis A. Alcaraz added that, "we had being the risk of selecting embryos that were not chromosomally normal, did not give rise to implantation or resulted in a child affected by Down syndrome."
